

FIND Study

Fetal Imaging & Neurodevelopment Study

Researchers at Western University are conducting a study to measure placental and brain function. We are invited healthy pregnant women to participate in our study, which involves two MRI scans (1 hour) during the 3rd trimester of pregnancy.

You might be eligible to participate if you are:

- 18+ years old
- Currently pregnant with one baby
 - Not taking any medications
- No history of cardiovascular disease

For more information please contact:
