

FIND Study

Fetal Imaging & Neurodevelopment Study

Researchers at Western University are conducting a study to measure placental and brain function. We are inviting healthy pregnant women or those who have just given birth to participate in our study, which involves a series of optional 1-hour MRI scans: 2 during the 3rd trimester of pregnancy, and 1 for your newborn.

You might be eligible to participate if you are:

- 18+ years old
- Currently pregnant with one baby OR given birth to one baby in the last 6 months
 - Not taking any medications
 - No history of cardiovascular disease

For more information please contact:
